

Project ZeroW

Innovations for Zero Food Loss & Waste

ZeroW directly addresses the challenge of food loss and waste by developing and testing a synergistic mix of innovations in real life conditions, with the aim to deliver ambitious reductions at all stages of the food supply chain from post-harvest to consumption.

ZeroW is a €12 million EU project about systemic innovations for zero food waste, funded under the Green Deal call of the Horizon Programme 2020 (Grant Agreement no. 101036388).

9 Living Labs

ZeroW creates impact through the demonstration of innovative FLW reduction solutions in nine systemic Living Labs along the real-life food chains to effectively address the multidimensional issue of FLW.

- #1 FLW monitoring and assessment
- #2 Innovative sustainable and smart packaging
- #3 Wasteless greenhouse solutions
- #4 Mobile food valorisation as a service
- #5 Ugly food identification
- #6 Data driven production process control
- #7 Food bank network
- #8 FLW valorisation through algae production
- #9 Informing and nudging consumers
